In the *real* world, Cathays Park,
Cardiff is home to Cardiff University:
a place in which students are
encouraged to think differently
about themselves and the world.

The place of Cathays Park itself plays a role here. It is a location whose architecture is regularly used as sets for television and film productions. How do the screen versions of these locations challenge us to think differently about what – and where – this place is?

This leaflet focuses on one particular building in Cathays Park, the Glamorgan Building. A range of films and TV programmes have been shot here, including Doctor Who, The Discovery of Witches, His Dark Materials, Torchwood, Traitors, and many more.
